Transgenic

An ex-breeder is an animal originating from uncoupled animals at the end of the cycle.

A reformed animal is an animal which is sold without age or weight criteria, subject to availability.

**Gerontology:** for the ageing of inbred or outbred old breeders, please contact us.

**The delivered pregnant females** are primiparous. Each ordered pregnant female will be invoiced. To guarantee the availability of pregnant females, we recommend you anticipate your programmed coupling requests.

The weight of the animal mentioned on the order form corresponds to the weight on shipment day from JANVIER LABS.

General terms and conditions for Sales and the Provision of Services can be found on our website www.janvier-labs.com

Do you remember in 2013 when we told you about our name change from JANVIER to JANVIER LABS?

Well, on top of the new name and logo, I wanted to share my plans with you. Indeed, I am taking JANVIER LABS to a new and ambitious dimension where the key words are "Excellence" and "Highly Secured Health Processes". We are investing in our future to give you satisfaction by delivering the best possible health standards that can be found in Europe and this will make JANVIER LABS a European reference.

JANVIER LABS: It's the story that began with a mouse and developed into a family-run company with strong values. That was in France in 1960 ... half a century ago already. It's from those same genes that our vision, ambition and strategy were born.

Our customers are at the centre of our work. JANVIER LABS is a company that listens to its customers. You are the ones who lead us on our quest for excellence: excellence in health standards, excellence in quality, excellence in customer satisfaction.

As a partner of your day-to-day business, JANVIER LABS is able to provide you with a fully reliable and stable experimental environment to support and facilitate your research work.

We have a deep respect for the work you do. This respect is illustrated in each gesture of our procedures. At JANVIER LABS, our ethical attitude begins where our story first began, in our breeding activity.

A company with cutting-edge innovation means a company that is agile and reactive. JANVIER LABS puts all its energy into bringing you constantly updated and exceptionally high quality services.

All of this is possible thanks to our committed employees, forming conscientious teams and working with professionalism and precision to answer our customers' needs in the understanding that excellence in health and safety is a team objective.

All of these examples illustrate that over and above a change of name, JANVIER LABS is in a perpetual state of development with the most advanced equipment, constantly improved processes and the level of its health and safety standards, whilst attracting the best talents.

JANVIER LABS has fulfilled its commitments by investing today for its future and for tomorrow's research. We have made no short-cuts on quality or security, with the aim to serve and satisfy you.

Eliam Janvier Chairwoman

### THE PARTNER YOU CAN RELY ON

### **Our commitments**Adaptability and reactivity

- Flexibility in order-taking
- Tailor-made response to each of your requirements
- · Personalised accompaniment for your projects

### **Guaranteed availability** Your models always in stock

- Each strain is bred in several production units
- Production capacity: 3 million rodents annually

## Analyses carried out externally Unbiased data for your research

- Objectivity and neutrality: health checks and analyses outsourced to independent laboratories
- · Reliability of analysis techniques

### Animal wellbeing It's in our genes

- · Optimal transport conditions for animal welfare
- Rodent socialisation
- · Highly qualified personnel

### **Calm and docile models Easy handling**

- Handled by human hands
- · Small production units for less noise
- No cohabitation of species

### In-house transport We guarantee what is under our control

- Qualified drivers trained by Janvier Labs
- · Ventilated and air-conditioned lorries
- Approved vehicles

### Your satisfaction: our priority

- · Sales assistance on hand and ready to help
- Local sales representative for your specific needs
- Team of Veterinary surgeons and Doctors to advise you
- An ISO 9001 certified company for all our activities

### THE PARTNER YOU CAN RELY ON

#### A company of reference is a company that keeps its promises.

Over the past 3 years, JANVIER LABS has consulted experts and made huge investments to build a state of the art technological and highly performing operating system with ultra multi-layered security, because "excellence in health processes" means "no compromise".

Our new production units are equipped with the latest and most advanced innovations in terms of security, automated procedures, optimal work stations and health considerations, naturally.

The production environment is strictly controlled within extremely stringent health procedures with many points of control, autoclaving and decontamination.

#### The heart of our business

#### **Breeding rodent models**

Genetic stability, very high health quality

#### **Provision of associated services**

Cryopreservation, assisted reproduction, customised breeding, model preparation laboratory

### Weekly deliveries to the nordic countries

City / Country	Day of delivery	Price in Euros
Denmark	Wednesday	
South and East of Sweden	Wednesday	
West of Sweden (Göteborg area)	Thursday	On request
Norway	Thursday	
Finland	Thursday	

### Flexibility, reactivity and reliability!

Place your orders up to noon on mondays the week of delivery.

#### Please note: our deliveries could be modified in weeks with public holidays:

Week 16	Monday 17 <sup>th</sup> April – Easter
Week 18	Monday 1 <sup>st</sup> May – Labour Day
Week 19	Monday 8 <sup>th</sup> May – 1945 Armistice
Week 21	Thursday 25th May – Ascension
Week 23	Monday 5 <sup>th</sup> June – Whitsuntide
Week 28	Friday 14th July – National Day
Week 33	Tuesday 15th August – Assumption Day
Week 44	Wednesday 1st November - All Saint's Day
Week 52	Monday 25 <sup>th</sup> December – Christmas Day

### Packaging adapted to animal's health status

Packaging (measurements)	Price in Euros
Filterless packaging - small model (420 x 305 x 150 mm)	
Filterless packaging - large model (580 x 435 x 150 mm)	
Filter packaging - small model (420 x 305 x 150 mm)	
Filter packaging - large model (580 x 435 x 150 mm)	
Facilitypack*: packaging for immunodeficient rodents and with SOPF health status (480 x 355 x 185 mm)	
Easypack : IATA-certified packaging - small model (454 x 289 x 190 mm)	On request
Easypack : IATA-certified packaging - large model (578 x 445 x 230 mm)	
Packaging for catheterised animals	
Dry ice packaging - large and small model	
Refreeze packaging	
Transport gel	
Gelatine block - in bag (sold separately)	

### Transport gel provided free

All of our packaging contains a drink substitute to rehydrate the animals during transit. This product guarantees the preservation of the SOPF and SPF status.

### Secure your research

whilst saving resources through sperm cryopreservation of your mice with the JAX™ Sperm Cryo Kit\*

#### The Kit is made up of 2 parts:

#### Media

- 3 ml vials, a vial is provided per strain
- in each Kit, an additional vial is included for training purposes

#### 25 straws are provided per strain in each Kit

- 20 for storage and 5 extra
- 4 cassettes for permanent storage and transport which contain 5 straws each

Straws and cassettes with unique identification numbers

#### Cryopreservation of sperm:

- Enables you to dramatically reduce costs associated with mouse colony maintenance, particularly of low use strains
- Protects your valuable mouse strains against disease, breeding cessation and disaster
- Protects your research by:
  - limiting genetic drift
  - preventing the spontaneous loss of phenotype
  - enabling easy recovery of SOPF mice: no quarantine required upon arrival
  - facilitating strain transfer to collaborators

<sup>&</sup>lt;sup>1</sup> Price valid for a 9-strain Kit

<sup>\*</sup> JANVIER LABS is the exclusive commercial provider of The Jackson Laboratory's JAX™ Sperm Cryo Kit in the following countries: Austria, Belgium, the Czech Republic, France, Germany, Hungary, Italy, Netherlands, Poland, Slovakia, Spain, Switzerland, Denmark, Finland, Norway, Sweden. Description		Objectives and details of the services	
Cryopreservation			
Sperm cryopreservation using the J	AX™ Sperm Cryo Kit	Technical sheet available on www.janvier-labs.com	
Sperm cry	opreservation	20 straws (each contains 4 aliquots of 10 μl of sperm - ready for use)	
Embryo cryopreservation		Technical sheet available on www.janvier-labs.com	
Your strain x JANVIER LABS	5′ strain or your strain ♂ and ♀	250 frozen embryos or 150 to 200 frozen embryos of the strain	
Quality controls of cryopreserved sp	erm or embryos	Technical sheet available on <b>www.janvier-labs.com</b>	
Cruonreserved cnorm	<i>in vitro</i> <sup>2</sup> quality control	2-cell stage development rate after defrosting + in vitro fertilisation	
Cryopreserved sperm	in vivo1,2 quality control	Birth rate after implantation of embryos from QC1 into pseudogregnant females	
Construction and archimeter	in vitro quality control	Viable embryo rate after defrosting and culture during 24 hours (from 2-cell stage to morula stage)	
Cryopreserved embryos	<i>in vivo</i> <sup>1</sup> quality control	Birth rate after defrosting and reimplantation into pseudopregnant females	
Cryo-storage of straws		Technical sheet available on www.janvier-labs.com	
Cryo-storage of frozen sperm straws <sup>2</sup>		Per year or long-time cryo-storage for 1 strain (up to 20 frozen sperm straws)	
Cryo-storage of frozen embryos		Per year or long-time cryo-storage for 1 strain (up to 250 frozen embryos)	

Assisted reproduction			
Rederivation by embryo transfer		Technical sheet available on www.janvier-labs.com	
Rapid rederivation	Your strain x JANVIER LABS' strain or your strain ♂ and ♀	Restitution of at least 2 visibly pregnant ♀	
Complete rederivation	Your strain x JANVIER LABS' strain or your strain ♂ and ♀	Restitution of 3 to 6 SOPF males and 3 to 6 SOPF females	
Recovery of a strain <sup>3</sup> from cryoprese	rved sperm	Technical sheet available on www.janvier-labs.com	
From cryopreserved sperm using th	e JAX™ Sperm Cryo Kit or other method	Restitution of at least 3 SOPF males and 3 SOPF females*	
Recovery of a strain from cryoprese	rved embryos	Technical sheet available on <b>www.janvier-labs.com</b>	
From embryos cryopreserve	ed by JANVIER LABS or by others	Restitution of at least 2 SOPF males and 2 SOPF females*	
Quick colony expansion by in vitro fe	rtilisation	Technical sheet available on www.janvier-labs.com	
in vitro fertilisation from fresh or cryopreserved sperm (quantity on request from 40 animals)		Restitution of the produced SOPF colony	
Strain rescue		Technical sheet available on www.janvier-labs.com	
Strain rescue using the male	Mating test and in vitro fertilisation	Restitution of the produced SOPF animals	
Strain rescue using the female	Mating test and ovarian transplant	Restitution of the produced SOPF animals	
For any service of assisted reproduction, optional: identification and biopsy of pups born			

<sup>\*</sup> subject to the quality of the provided material in case of cryopreservation externally

JANVIER LABS is the exclusive commercial provider of The Jackson Laboratory's JAX™ Sperm Cryo Kit in the following countries: Austria, Belgium, the Czech Republic, France, Germany, Hungary, Italy,

Ureter ligation (rat)			
Other types of ligation			
Catheterisation	Technical sheet available on www.janvier-labs.com		
Non-vascular catheters: Bile duct			
Stomach*, duodenum*, jejunum*, ileum*, colon*, intra-peritoneal* (injection)	Rats with a minimum weight of 200 q,		
Bladder*	01 200 g,		
Vascular catheters:	Pregnant female rats	On request	
Jugular vein	(from day 9-10),	On request	
Femoral vein	Main discoulant and a second		
Carotid artery	Mice (jugular and non-vascular catheters on the digestive tract)		
Femoral artery	catheters on the digestive tract)		
Double vascular catheter			
Double vascular / non-vascular catheter			

\* infusion only
The weight of the animal required on the order form corresponds to the weight at the moment of the operation.
The price of the animal, the preparation before or after the operations and the treatments will be added to the price of the operation.

#### **Experimental protocols**

Services (non-exhaustive list of protocols)	Species and characteristics of the models	Price in Euros
Customised protocols and models	Technical sheet available on www.janvier-labs.com	
Examples of protocols:		
DIO (Diet Induced Obesity) studies with different energy sources (lipids, carbohydrates, proteins)		
Restricted diet studies	All species depending on	
Surgical protocol inducing diseases like osteoporosis by ovariectomy	the needs of the protocol	On request
Inorganic or organic implant placement and subsequent monitoring including its evolution and its interaction with the animal	and its feasibility	
Pathological models	Technical sheet available on www	v.janvier-labs.com
Examples of pathological experimental models:		
Surgery model: jaundice model in rat, osteoporosis model in rat by ovariectomy of females		
Substance injection model: arthritis model by Freund adjuvant injection, model of type II diabetes by streptozotocin injection in rats and mice	All species:	
Diet-induced model: induced obesity by diet, hypercholesterolemia / atherosclerosis induced by high saturated fat and cholesterol diet, hypertriglyceridemia / insulin tolerance by high fructose / sucrose diet	rats, mice gerbils and hamsters	On request

#### **Biological products**

Products	Species and characteristics	Pri	ce in Euros (per	ml)
Products	of the models	1 to 100 ml	101 to 250 ml	251 to 500 ml
Blood products		Technical sheet a	vailable on <b>www.j</b>	anvier-labs.com
	Outbred rat			
	Inbred rat			
Whole blood	Outbred mouse			
	Inbred mouse			
	Gerbil and hamster	On request		
	Outbred rat			
	Inbred rat			
Plasma	Outbred mouse			
	Inbred mouse			
	Gerbil and hamster			
	Outbred rat			
	Inbred rat			
Serum	Outbred mouse			
	Inbred mouse			
	Gerbil and hamster			
Serum for embryo culture	Outbred rat			

The standard anti-coagulants are lithium heparin and EDTA K3. Bottled in 10 ml vials.

For any other requests (anti-coagulants, packaging, strain, mutant models, age and sex determined), do not he sitate to contact us.

Products	Species and characteristics of the models	Price in Euros
Organ sampling 7	echnical sheet available on <b>www</b>	.janvier-labs.com
Nervous system Brain with or without the cerebellum, spinal cord		
Endocrine system Adrenal glands, thyroid		
Immune system Thymus, spleen		
Digestive system Tongue, salivary glands, stomach, intestine (duodenum, jejunum, ileum), caecum, colon, liver, pancreas	All species:	0
Adipose tissue  Mesenteric adipose tissue, peri-gonadal adipose tissue, Perirenal adipose tissue, brown adipose tissue	rats, mice, gerbils and hamsters	On request
Urogenital system Kidneys, bladder, prostate, testes, seminal vesicle, ovaries, uterus		
Cardiopulmonary system Lungs, heart, aorta		
Other: skin, bones, muscle, eyes		

Products	Species and characteristics of the models	Price in Euros
Other biological materials         Technical sheet available on www.janvier-labs.com		
Urine	All species: rats, mice, gerbils and hamsters	On request
Feces		
Milk (rat, mouse)		
Amniotic fluid		
Cerebrospinal fluid	Rats
