

Press release

Please fill in this form and return it to graduateschoolhealth@au.dk in Word format along with a portrait photo in JPEG format, if you would like it to accompany your press release, no later than three weeks prior to your defence.

Basic information

Name: Rasmus Søndergaard Aagaard Email: rasmus.aagaard@clin.au.dk Phone: 22559129

Department of: Clinical Medicine

Main supervisor: Professor, ph.d. Bo Løfgren

Title of dissertation: CARDIAC ULTRASOUND: DEAD OR ALIVE – DOES IT MATTER?
Experimental and clinical studies

Date for defence: December 18, 2017 at (time of day): 14.00 Place: Auditorium Randers Regional Hospital

Press release (Danish)

Overskrift:

Ultralydsskaning af patienter med hjertestop

Manchet - indledning:

Ultralydfund og kvaliteten af ultralydsbilleder under hjertestop og genoplivning er beskrevet i et nyt ph.d.-projekt fra Aarhus Universitet, Health. Projektet er gennemført af Rasmus Aagaard, der forsvarer projektet den 18. december 2017.

Pressemeldelsen

Ved hjertestop er det afgørende at en den udløsende årsag til hjertestop identificeres mens der pågår genoplivning. Ultralyd af hjertet har potentielle til bidrage til identifikation af årsager til hjertestop, men der mangler viden på området. Det har hidtil været antaget at ultralydfund kendt fra levende patienter kan overføres til patienten med hjertestop - f.eks. kan ultralydfund af en forstørret højre hjertehalvdel være et tegn på blodprop i lungeren hos en levende patient. Ved hjælp af grisemodeller har dette ph.d.-projekt demonstreret at hjertestop i sig selv forårsager forstørrelse af højre hjertehalvdel og at dette tegn derfor er uspecifikt når patienter har hjertestop. Ydermere er det i et klinisk studie undersøgt på hvilket tidspunkter under genoplivning de bedste ultralydsbilleder kan opnås.

Forsvaret af ph.d.-projektet er offentligt og finder sted den 18. december, 2017 kl. 14.00 i Auditoriet, Regionshospitalet Randers, Skovlyvej 15, 8930 Randers NØ. Titlen på projektet er "CARDIAC ULTRASOUND: DEAD OR ALIVE – DOES IT MATTER? Experimental and clinical studies".

Yderligere oplysninger: Ph.d.-studerende Rasmus Aagaard, e-mail: rasmus.aagaard@clin.au.dk, tlf. 2255 9129.

Bedømmelsesudvalg:

Hans Eiskjær, Professor, overlæge, dr.med. (Formand)
Hjertesygdomme, Aarhus Universitetshospital

Susanna Price, MD, FESC, Honorary Senior Lecturer
Royal Brompton & Harefield, NHS Foundation Trust, London, United Kingdom

Benedict Kjærgaard, overlæge, klinisk lektor
Klinisk Hjerte-lunge, Hjerte-lunge kirurgi, Aalborg Universitetshospital

Press release (English)

Headline: Focused cardiac ultrasound during cardiopulmonary resuscitation

Lead paragraph:

Identifying reversible causes of cardiac arrest is important during cardiopulmonary resuscitation. Focused cardiac ultrasound has potential to identify reversible causes of cardiac arrest, but knowledge about the interpretation of ultrasound findings is lacking. It has been assumed that ultrasound findings in patients with spontaneous circulation can be extrapolated to patients in cardiac arrest e.g. a dilated right sided heart chambers can be a sign of pulmonary embolism in patients with spontaneous circulation. However, using swine models we have demonstrated that dilation of right sided heart chambers is inherent to cardiac arrest. Thus, this sign may not be specific for pulmonary embolism during cardiac arrest. Moreover, in a clinical study we have compared the quality of ultrasound images obtained during different timepoints during resuscitation.

The project was carried out by Rasmus Aagaard, who is defending his dissertation on December 18, 2017.

The defence is public and takes place on December 18, 2017 at Auditoriet, Regional Hospital Randers, Skovlyvej 15, 8930 Randers NØ. The title of the project is CARDIAC ULTRASOUND: DEAD OR ALIVE – DOES IT MATTER? Experimental and clinical studies. For more information, please contact PhD student Rasmus Aagaard, email: rasmus.aagaard@clin.au.dk, Phone +45 2255 9129.

Assessment committee:

Hans Eiskjær, Professor, consultant, MD, DMSc (Chairman)
Department of Cardiology, Aarhus University Hospital, Denmark

Susanna Price, MD, FESC, Honorary Senior Lecturer
Royal Brompton & Harefield, NHS Foundation Trust, London, United Kingdom

Benedict Kjærgaard, MD, Associate Professor,
Department of Cardiothoracic Surgery, Aalborg University Hospital, Denmark

Permission

By sending in this form:

- I hereby grant permission to publish the above Danish and English press releases as well as any submitted photo.
- I confirm that I have been informed that any applicable inventions shall be treated confidentially and shall under no circumstances whatsoever be published, presented or mentioned prior to submission of a patent application, and that I have an obligation to inform my head of department and the university's Patents Committee if I believe I have made an invention in connection with my work. I also confirm that I am not aware that publication violates any other possible holders of a copyright.
